🐙 github.com/mskmohan50-profile

PROFESSIONAL SUMMARY

Software Developer and Computer Science graduate with experience in React.js, Node.js, Python, and AI applications. Built and deployed scalable web applications using modern development practices, cloud technologies, and RESTful architectures. Strong foundation in software engineering, databases, and problem-solving.

PROFESSIONAL EXPERIENCE

Software Developer Intern, Atlysbridge Solutions Bangalore
• Developed full-stack features using React.js, Flask, and PostgreSQL for scalable, maintainable applications
• Built and integrated REST APIs to streamline data management and inter-service communication
• Contributed to code reviews, testing, and performance tuning to ensure high-quality releases

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering, Coimbatore Institute of Technology 2023 – 05/2026
Diploma in Computer Science, Sri Rengaswarar Polytechnic College, Namakkal 2020 – 2023
95.5%
HSS, Govt. Boys Higher Secondary School, Trichy 2018 – 2020
62.8%

CODING PROFILE

- LeetCode — 100+ problems solved
- CodeChef — 150+ problems solved
- GeeksforGeeks — 50+ problems solved

TECHNICAL SKILLS

Languages Python, JavaScript, Java, SQL, HTML, CSS	Frontend / Backend React.js, Redux, Node.js, Express.js, Flask, Django, REST APIs, Socket.IO, Typescript
Databases & DevOps MongoDB, PostgreSQL, Redis Git, Docker, AWS EC2, GitHub Actions, Nginx	AI / ML & Tools scikit-learn, OpenCV, YOLOv5, Pandas, NumPy, Figma, Hugging Face

CERTIFICATIONS

AI/ML & Full Stack Development
Project Development Cell, Coimbatore

PROJECTS

- AI Agent Workflow Builder** [🔗](#), AI Agents • Workflow Automation • LLM • Groq API • Next.js • TypeScript • Node.js • Express • PostgreSQL • Hasura • Authentication • RBAC • Webhooks • REST APIs
• Built an n8n-style visual AI workflow builder with LLM, HTTP, database, conditional, notification, and approval nodes.
• Implemented manual, webhook, scheduled, and database-event triggers with live execution status.
• Added Nhost Auth, Hasura RBAC, organization management, and approval-based workflow pause/resume.
• Integrated Groq API for real-time LLM execution and designed a modular Node.js/Express backend.
- AI-Powered Customer Complaint Management System** [🔗](#), React, Redux, TypeScript, FastAPI, LangGraph, Groq LLM, PostgreSQL
• Built a full-stack QMS application using a 7-node LangGraph agent pipeline (Groq LLMs) to auto-extract complaint data, classify risk, detect duplicates, and recommend CAPA from uploaded pharma complaint documents
• Implemented real-time auto-save and chat-driven form editing with React + Redux Toolkit; FastAPI + SQLAlchemy backend supporting multiple databases
- Scalable Website Performance Audit Platform** [🔗](#), React, TypeScript, Tailwind CSS, Node.js, Express.js, Axios, Redis/Node Cache
• Built a scalable URL auditing platform that evaluates website performance, SEO, accessibility, security, and best practices.
• Developed REST APIs with input validation, rate limiting, caching, concurrency control, request timeouts, structured logging, and error handling.
• Implemented automated testing using Jest/Supertest and CI workflows with GitHub Actions.
- Manufacturing Quality Intelligence Dashboard**, React, TypeScript, Express, MongoDB, JWT, Recharts
• Built full-stack analytics app with JWT auth, ownership-scoped REST APIs, and CSV/Excel data ingestion (PapaParse, SheetJS)
• Delivered KPI dashboards, trend/defect visualizations (Recharts), and CSV/PDF export (jsPDF)
• Added append-only audit logging, data quality scoring, and a documented multi-tenant scaling architecture
